Tregays Farm	Lerryn	£	6,498.39	£ 6,498.39	Jan-23	Mar-24			
The applicant want to fence off a small meadow for a wildlife haven, exclude the cattle from the stream, and turn it over to nature to									
become a wildflower meadow with occasional summer grazing to manage the vegetation. This area will provide important forage for									
bumblebees and other pollinating insects, together with birds, bats and wildlife. As well as fencing off the meadow, they want to plant a									
hedge to fill in gaps in an existing hedge line. This will provide greater connectivity and biodiversity.

 Gwealgues Tree Nursery
 Helston
 £
 3,779.05
 £
 5,398.64
 Jan-23
 Jan-24

 FiPL is funding a project to grow trees of local provenance from seed, cuttings and from grafting as they have identified a need for a local tree nursery to help propagate sufficient quality trees for planting at scale. Growing trees on their own nursery will improve biosecurity but also allow them to grow trees best genetically suited and able to thrive in the local climate. Their aim is to use these trees to create an orchard site to conserve the heritage of Cornish fruit trees and provide a safe space for the rural community to meet, share ideas and enjoy caring for the environment.

Business Name	Town	FiPL Grant	Awarded	Total Pro	ject Cost	Project Start Date	Project End Date		
Boscarnon Farm	Helston	£	21,192.76	£	25,776.76	Apr-23	Jul-23		
FiPL is supporting the purchase of a livestock trailer to unlock more grazing for his cattle and access new sites e.g. 150 acres (63Ha) at									
North Goonhilly which is cu	irrently not grazed du	e to poor a	ccess. The ne	w trailer	will allow sa	fe off-road unloading	and loading of		
cattle, prevent crossing of b	ousy roads and impro	ve animal w	velfare. The t	railer wou	uld also enat	ole more rapid remov	al of stock in any		
kind of emergency. It will ir	ncrease business effici	ency and re	esilience and	less reliar	nce on othei	r hauliers. It will also e	enable more		
managed grazing, be better	r for habitat maintena	ince and ind	crease biodiv	ersity. Gra	azing cattle	on previously ungraze	ed areas will prevent		
ingress of unwanted scrub,	will increase soil orga	nic matter,	be better fo	r water re	etention and	climate resilience an	d well as increasing		
carbon sequestration.

Higher Keigwin Farm		£	56,652.64	£	81,041.68	Apr-23	Mar-24

FiPL is funding a collaborative application to build and equip a butchery and cold store on their land to serve the local conservation graziers and provide a focus for engagement activities around local food production and its' links to the landscape. The number of abattoirs in Cornwall is declining, and the larger scale abattoirs are unable to hang carcasses for the required time and in the required conditions to bring out the quality of the meat. The butchery offered at these larger units is also not tailored to smaller conservation grazed breeds and the meat quality is often compromised by poor butchery. This project aims to resolve this issue.

Goonown Growers	St Agnes	37142,21	£ 52,215.30	May-23	Mar-24

Goonown Growers is a successful CIC in St Agnes growing and supplying organic produce to the local community through box schemes as well as welcoming and training over 35 local volunteers in sustainable horticulture. They are seeking funding for to build and equip a small community barn for which planning permission is already granted. This is to provide an all-weather, all-year round hub for volunteers where they would like to host courses and workshops in home composting, no-dig gardening and sustainability-related topics along with food cooking and growing. They want to bring more of the local community to the farm to learn from and enjoy the surroundings, and inspire them to return home with new skills, ideas and techniques for their home & garden.

Farm Cornwall is delivering a programme to farmers across Cornwall explaining how the funding and support for agriculture is changing. The programme also looks at farm business viability and the need to be precise in the application of inputs, and the need to look at the environmental benefits of using less routine veterinary medicines.. The project aims to deliver 3 farm walk workshops which will further embed the learning from the indoor meetings and allow farmers to discuss and be self-critical of their own worming management plans. In addition, the project will deliver 4 farm walks for young farmers **Business Name** Town FiPL Grant Awarded **Total Project Cost** Project Start Date Project End Date FiPL184 West Cornwall Grassland £ £ Camborne 9.203.85 10.341.40 Dec-23 Jan-24 Society FiPL is funding a conference which will consist of a series of panel discussions and key note speakers, local to or with first hand knowledge of the area who will cover a range of subject that are relevent to local farmers and landowners. these will include sessions on carbon sequestration, soil health, ELMS & SFI, Agrobiodiversity, Herbal Leys, Grazing Management, Business Management and Food Processing. FiPL Grant Awarded Town **Total Project Cost** FiPL187 **Business Name** Project Start Date Project End Date **RJ** Trezise Penzance 12,950.00 £ 18.500.00 Feb-24 Mar-24 £ FiPL has funded a tractor drawn livestock trailer with hydraulic lifting axles complete with internal and external gates. This trailer will support the primary business activity of conservation grazing which is a niche activity on niche / non-typical ground (e.g moorland not improved grassland). This trailer will give the team the opportunity to work more efficiently and thus expand the enterprise to deliver more better-quality grazing across the protected landscape. FiPL7032 FiPL Grant Awarded Total Project Cost Project Start Date **Project End Date Business Name** Town JH and LD Dunne 3,045.00 St Austell f £ 3.045.00 Dec-23 Jan-24 This project seeks to assess to establish the extent of the scheduled monument at Galowras Farm. Surveying will increase our understanding of the monument and its historical importance. Establishing the extent and more precise location of the monument will facilitate correctly located fencing and allow improved future management. Management of the monument will be improved by sympathetically positioned fencing, controlled stock grazing access and controlling bracken on the monument. The monument is currently assessed as vulnerable and in declining condition. **Business Name** Town **FiPL Grant Awarded Total Project Cost Project Start Date** Project End Date FiPL195 Organic Research Centre Across Cornwall 9.970.50 f 9.970.50 Jan-24 Mar-24 FiPL has funded a project which will be delivered in two phases with the following overall objectives; to support the transition to agroecological farming systems in Cornwall; to find a collaborative solution to distributing local agroecological produce in Cornwall, joining the dots between existing food hubs and supporting organisations; to reduce emissions, grower time and costs (which ultimately would be passed to consumer) and; to enhance production and access to local organic / agroecological produce. **Business Name** FiPL Grant Awarded FiPL7072 Town Total Project Cost Project Start Date Project End Date The Lost Gardens of £ 9.754.20 £ 10.453.80 St Austell Mar-24 Apr-24 Heligan The purpose of this project is to engage our visitors with regenerative farm practices which demonstrate how we can grow food in a way that diminishes the impact of agriculture while delivering a positive outcome for the environment, biodiversity and people. FiPL has funded an area for pigs in pasture which allows the public to expore and see demonstrations of how pigs can be kept without the need

for soya-based feeds.

Crougy & Co Limited	Camborne	£	38,156.15	£	38,156.15	Feb-24	Mar-24

FiPL has funded the first desk-based study on the alternatives to soya feedstock in the pig and poultry industry. This project will help Cornish pig and poultry farmers to transition towards a more sustainable and resilient feedstock. In addition, this project aism to deliver dynamic events such as 'world cafe discussions' encouraging participants to share perspectives and expertise.

intoBodmin CIC	Bodmin	£ 9,500	0.00	£ 11,705.00	Feb-24	Mar-24	

FiPL is funding a pilot event with the intention to develop the idea of a larger project over 12 events, one in each section of the protected landscape, designed to connect the farming community, young farmers (and old) with the local community. This event will educate people about the role of farming in climate resilience and use art in the landscape to break down barriers. The events will raise the profile of Cornwall National Landscape, the work of FiPL, bring in a Bee Mindful ethos with the use of the bench, and aims to ultimately decrease loneliness with the Farmer's Choir, offering a lasting legacy in each section of the protected landscape.

Tresibbet Farm	Bodmin	£	46,004.67	£	253,100.38	May-24	Mar-25	

This project has been funded to address the condition and setting of two SAMs one of which will be removed from the Historic
England's Heritage at Risk Register. The funds will support archaeological and ecological surveys which will inform management plans
and the delivery of practical works on the ground (bracken and scrub removal, targetted repairs, diverted access tracks, habitat
enhancement and future ELM options).
